Digitize Your Feed Operation.

Treatment formulation, mixed, fed and refusal, recorded as they happen.

THE PROBLEM

Commercial feed software is built to feed the herd. It does not know what a treatment, a study day or an individual animal's refusal is.

THE IMPACT

The research barn is left with clipboards, spreadsheets and hours of manual data entry between the scale and the PI.

THE ANSWER

CalanIQ™ FeedOps feeds individual or grouped animals with the precision research requires, and records every step without anyone writing it down.

1 Plan

Define the diets for each study. Publish the plan to the barn.

2 Feed

Guided workflow on a tablet. Batch, mix, feed, refusals, in order.

3 Captured

Weights go straight from the scale to the database. No manual entry.

4 Delivered

Intake by animal, by study day, on the PI's desk. Immediately.

THE RESULT

More Data. Less Work.

sales@americancalan.com · (603) 942-7711

Efficient

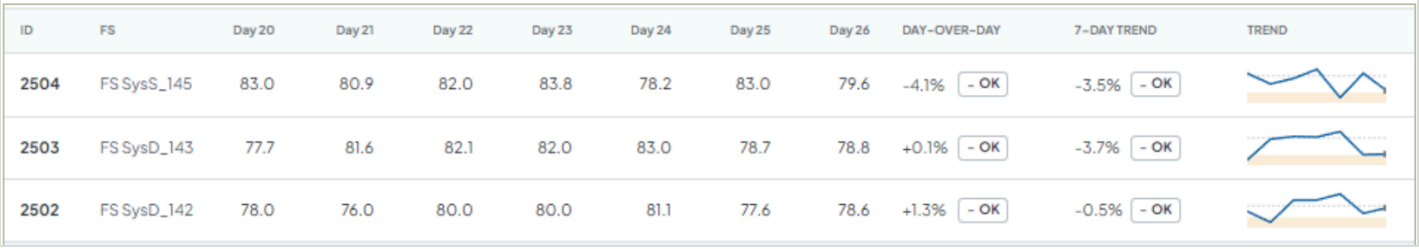

- Scale weights go straight to the database.
- Every record auto-aligned to your Study Day.
- Little to no back office work.
- Ingredient usage tracked in detail, batch by batch.
- Run multiple studies at once from one feed plan.

Accessible

- Feeding and intake data, wherever and whenever you want it.
- Intake by animal, by study day, with trend and alert status.
- Every study and every animal in one platform.
- Historical data for cross-study analysis.
- Data privacy that PIs and sponsors require.

Accurate

- Intake from measured weights, never transcribed.
- Feeding executed to the precision you specify.
- Every variance quantified and reported.
- Refusals tied to the animal and the ration fed.
- A complete, auditable record of every feeding.

ID	FS	Day 20	Day 21	Day 22	Day 23	Day 24	Day 25	Day 26	DAY-OVER-DAY	7-DAY TREND	TREND
2504	FS SysS_145	83.0	80.9	82.0	83.8	78.2	83.0	79.6	-4.1% - OK	-3.5% - OK	
2503	FS SysD_143	77.7	81.6	82.1	82.0	83.0	78.7	78.8	+0.1% - OK	-3.7% - OK	
2502	FS SysD_142	78.0	76.0	80.0	80.0	81.1	77.6	78.6	+1.3% - OK	-0.5% - OK	

Feed Intake Trends in CalanIQ: intake by animal, by study day, with trend and alert status, the same day refusals are collected.

STUDY TEAM

Set the plan. Trust the result.

Define the diets. Feeding is executed to your specification and intake comes back resolved to the individual animal.

FEED OPERATIONS TEAM

No more clipboard.

One connected workflow for batch, mix, feed and refusals. Every weight goes to the cloud the moment it is read.

FACILITY

One platform. Every study.

Every study, every animal, every ingredient in one place, with less manual work across the whole operation.

Works with your barn

Tie stall, pen, Hokofarm or the Calan Broadbent Feeding System. One feed operation, however your animals are housed.

Connects to your scale

A Bluetooth scale indicator integrates with the feeding equipment you already run.
